

Skate Tags and Stages

The colored pipe cleaner tags placed on your skater's skates do not indicate their level or ability. The tags are used simply to group the skaters. Skating skills along with age are taken into consideration when creating the skater groups. Evaluations are done weekly so movement into another group may occur at any time.

Skaters in CanSkate will receive a Stage Badge once they have achieved all three of the fundamental movements in their Stage. The fundamental movements are: Balance (green), Agility (blue) and Control (red). If only one or two fundamental movements are achieved, skaters will receive a ribbon.
